UNDERHOOD PARTS OFFERING

Beck/Arnley offers a wide range of engine parts — mechanical and electrical — that meet foreign nameplate OE specifications for form, fit and function.

ENGINE: MECHANICAL OFFERING

COOLING

The Beck/Arnley cooling parts offering includes:

- New Water Pumps — Resin and Metal Impellers
- Thermostats
- Water Outlet Flanges
- Fan Clutches

ENGINE COMPONENTS

Beck/Arnley offers a wide range of Engine Components.

- Engine Mounts — includes Hydraulic, Vacuum, Active and Rubber
- Valve Cover Assemblies
- Variable Valve Timing Solenoids
- Ancillary Engine Parts
- Crankcase Vent Valves and PCV Valves
- Canister Purge Controls

FILTRATION

The Beck/Arnley Filtration line includes:

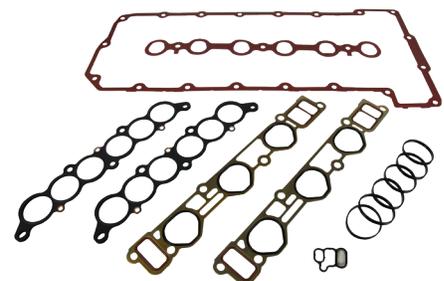

- Air Filters
- Cabin Air Filters
- Fuel Filters
- Oil Filters — designed for Synthetic and Conventional Oils
- Oil Filter Caps
- Transmission Filter Kits — includes o-rings and/or Gaskets as required

GASKETS

Beck/Arnley provides a comprehensive Gasket offering with the latest head gasket technology including Multi-Layer Steel (MLS) to meet the specific engine requirement.

- Valve Cover Gaskets
- Manifold Gaskets
- Head Gasket Sets
- Ancillary Gaskets

ENGINE: ELECTRICAL OFFERING

ELECTRICAL COMPONENTS

Beck/Arnley offers a wide selection of electrical components:

- Switches
- Blower Motor Resistors
- Fan Control Modules

IGNITION

The Beck/Arnley Ignition offering includes: coils, and sensors.

Many of today's engines are equipped with "coil-on-plug" technology (each spark plug has its own separate ignition coil). This coil is connected directly to the spark plug by a rubber boot, allowing the coil a longer time to accumulate a charge between sparks.

FUEL DELIVERY

Beck/Arnley Fuel Delivery offering includes:

- Electrical Fuel Pumps
- Electronic Throttle Bodies
- Fuel Injection Products

SENSORS

Beck/Arnley offers a wide variety of Sensors for today's engines. Sensors play a critical role in a vehicle's efficient operation. Sensors are made with corrosion resistant terminals and coatings. Our most popular sensors are:

- Cam/Crank Sensors
- TPS (Throttle Position Sensor)
- MAP Sensors (Manifold Absolute Pressure)
- Knock and Temperature Sensors
- MAF (Mass Air Flow)

PRODUCT HIGHLIGHTS

MOUNTS

- Engine mounts control the engine torque for stability
- Transmission mounts support the transmission
- The mount type is a match to OE design specifications (hydraulic, vacuum, active or rubber)
- Additional hardware is included when necessary for a complete installation
- Premium materials and construction effectively dampen vibration

WATER PUMPS

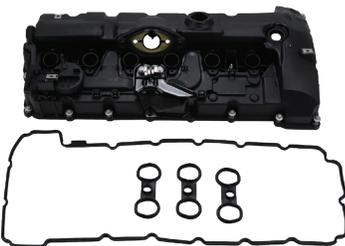

- OE form, fit and function
- In many cases, we offer the choice between a resin impeller or metal impeller
- High quality bearings, sealed and lubricated for life
- All necessary seals and gaskets are included for a complete installation

VALVE COVER GASKET SETS

- OE form, fit and function
- Aluminum bolts included for a complete installation on select applications
- Packaged in clear plastic for easy visibility and identification of all components

VALVE COVER ASSEMBLIES

- OE form, fit and function
- Supplied with a new valve cover gasket

IGNITION COILS

- OE form, fit and function
- If the OE part has a resistor in the coil boot, the Beck/Arnley coil will also have a resistor
- All coils are mold type coils
- Each coil is wrapped in protective sheeting for shipping purposes
