

Premium National® Unitized Pinion Seal

National has built a reputation as one of the most respected names in the industry. We have offered premium sealing solutions for more than 75 years. Our engineering team keeps pace with the industry and provides wheel-end sealing solutions for today's commercial vehicles.

National Heavy Duty Unitized Pinion Seals provide a new and smooth running surface and a durable seal.

A UNITIZED DESIGN

- Protects main sealing lips during installation
- Avoids lip damage
- Eliminates lip rollover
- One piece, easy installation

B SURE-LOCK ID RIB DESIGN

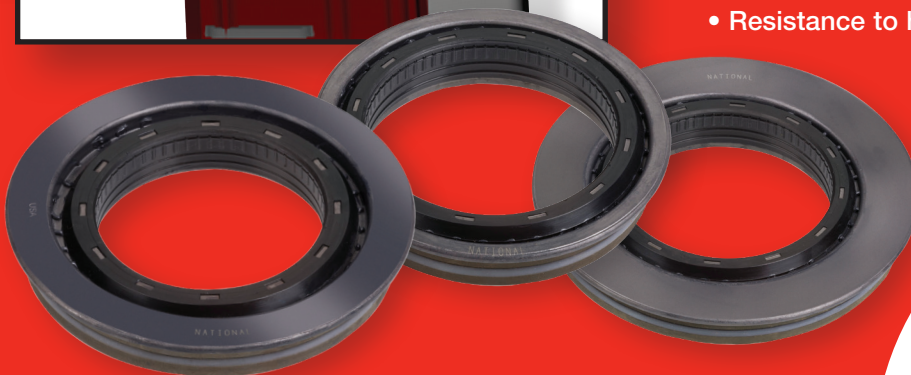

- Reuse a yoke rather than replacing
- Compensates for imperfect yoke surfaces
- Provides superior shaft sealing capability
- Allows for use of cast iron and forged yokes

C INTEGRATED CONTAMINANT EXCLUDER LIPS

- Double lip design provides improved contaminant exclusion
- Eliminates the need for additional P.O.S.E.™ (Press On Shaft Extruder)

D FLUOROELASTOMER COMPOUND

- Compatible with a wide variety of lubricants
- Resistance to high temperatures enhances seal performance
