FEL-PRO[®] PERMATORQUE[®] MLS HEAD GASKET WITH NEXTGEN COATING

Fel-Pro engineers continue to set the standard for sealing technology specifically **designed for the repair environment** to help seal imperfect surfaces.

Our new PermaTorque MLS head gasket with next generation coating helps to accommodate for today's higher temperature engine environment. The precise amount of coating is applied to the head gaskets to compensate for surface finishes as rough as 80 Ra, which creates a reliable seal you can count on.

Install Fel-Pro – The Gasket Professionals Trust™.

KEY FEATURES

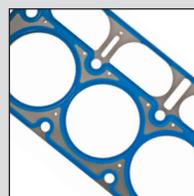

- 1** NextGen proprietary coating resists scrubbing and compensates for surface finishes as rough as 80 Ra.

- 2** LaserWeld™ exclusive stopper layer technology prevents gasket damage and helps to ensure a superior combustion seal.

- 3** Multiple layers of full hard stainless steel to maintain shape and accommodate head lift.

- 4** Strategically placed sealing beads at all vital areas to eliminate leak paths.
