

WE LOVE RAIN

WORN WIPERS ARE DANGEROUS

Good visibility

A perfect wipe? You must be using brand new Champion wipers. One or two minor streaks in the margins of the windshield this is acceptable.

Wind lift

If the wiper "misses" parts of the windshield at high speed, replace the wiper blades and check the wiper arm for damage or wear - replace if necessary.

Unwashed areas

Deterioration of wiper blade linkage or decreased wiper pressure can leave parts of the windshield unwashed.

Permanent small streaks

Multiple and recurring streaks in the central part of the windshield are indicators the wiper is due for replacement. We recommend you change your wipers at the next opportunity.

Lace curtains

Lack of use can result in deformation of the wiper blade lip causing a veil effect across the windshield - particularly dangerous at night. Change your wipers as soon as possible.

Chatter hopping

Deformed wiper rubber, worn linkage or wiper arm can cause juddering across the screen leaving behind radial streaks. Change your wiper blades and replace other parts as necessary.

Noisy

Noisy wipers may be a sign that the wiper element is deformed or hardened or that the wiper blade structure is worn. Time to replace them.

Lines or bands

Wiper rubber wears out or becomes damaged with age resulting in thick bands of uncleared water left on the windshield. Change your wipers straight away.
