## AMORTIGUADORES Y STRUTS

# EL SOPORTE QUE TÚ DEMANDAS

INSPECCIONE SUS  
AMORTIGUADORES Y STRUTS CADA

# 60,000 KMS.

### CAMPAÑAS DE CONCIENTIZACIÓN AL CONSUMIDOR

Monroe destaca la importancia de inspeccionar los Amortiguadores y Struts como una medida clave de seguridad para los conductores desempeñando un papel fundamental en la estabilidad y el control del vehículo, así como en la capacidad de respuesta de la dirección y frenos.

Al inspeccionar y, si es necesario, reemplazar estos componentes se mantiene el vehículo en óptimas condiciones de funcionamiento ayudando a prevenir accidentes y una experiencia estable y segura en la conducción.

### UN ESPECTRO DE TECNOLOGÍAS

Con las últimas tecnologías mundiales de válvulas de equipo original, los productos Monroe para el control de manejo están diseñados con la tecnología adecuada para cada vehículo y así para **proporcionar un control adicional para mejorar su experiencia de manejo.**

Y STRUTS**  
**Catálogo 2024**

## Cómo leer el catálogo Monroe

El catálogo cuenta con un índice por **MODELO** para encontrar la aplicación (vehículo) que está buscando. Los vehículos están ordenados en el catálogo por orden alfabético dentro de su marca.

• Por ejemplo, el auto March, puede encontrarlo dentro de la marca Nissan, ordenado de forma alfabética. Después del orden alfabético, los vehículos están ordenados por fecha, comenzando por los modelos más nuevos.

• Por ejemplo, primero encontrará las aplicaciones para los autos **Fiesta Ikon 2011-2015**, después los que corresponden a los autos **Figo 2016-2020 y así sucesivamente**.

Finalmente podrá encontrar la aplicación que necesita acomodada en su columna correspondiente por línea, sin embargo, tome en cuenta que:

**A) Los amortiguadores OESpectrum y Reflex se encuentran en las mismas columnas, encontrando primero el número correspondientes a OESpectrum y debajo el número correspondiente a Reflex.**

**B) Los amortiguadores Gas Magnum, las bases de Amortiguadores y Cubre Polvo se encuentran en la misma columna. (Los números de parte de Bases de Amortiguadores y Cubre Polvo se pueden identificar de acuerdo con el símbolo correspondiente).**

**C) De igual manera, los amortiguadores Monro-Matic Plus y Monro-Matic Hidráulico se encuentran en las mismas columnas, encontrando primero el número correspondiente a Monro-Matic Plus y debajo el número correspondiente a Monro-Matic Hidráulico.**

**D) Los amortiguadores RoadMatic, Load Adjusting y Max-Air se encuentran en la misma columna, encontrando primero el número correspondiente a Load Adjusting y abajo el número Max-Air. ( El número RoadMatic se identifica por contar con 6 dígitos 25XXXXX, 40XXXX).**

**E) Algunos números de parte tienen alguna característica especial por lo que le recomendamos observe las notas al pie de cada página.**

| n                      | Nuevo número de parte                                                                                                                                                                                  |
| g                      | Número de parte bajo pedido especial                                                                                                                                                                   |
| .                      | Número de parte hasta agotar existencias                                                                                                                                                               |
| R                      | Monro-Matic Plus Reforzado                                                                                                                                                                             |
| 911138<br>37138        | Letras grises indican reemplazo                                                                                                                                                                        |
| EL                     | Unidad Premium que son considerados con vástago de extensión lenta.                                                                                                                                    |
| H                      | Unidad Premium hidráulica, el vástago no se extenderá por sí mismo ya que este número de parte no contiene gas.                                                                                        |
| 0                      | Este número de parte incluye: Base de amortiguador, cubre polvo y tope de rebote                                                                                                                       |
| 1                      | Puede que se requiera el juego de piezas AK27 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 2                      | Puede que se requiera el juego de piezas AK28 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 3                      | Puede que se requiera el juego de piezas AK30 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 4                      | Se requiere el juego de adaptadores AK16 para reemplazar amortiguadores neumáticos ajustables en los vehículos equipados con un sistema de nivelación automática.                                      |
| 7                      | Puede que se requiera el juego de piezas AK23 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 8                      | El compresor de resorte NO ES necesario para reemplazar los struts en este vehículo.                                                                                                                   |
| 10                     | Algunos modelos con suspensión de 4", pueden necesitar el número RS6640 para evitar vibraciones.                                                                                                       |
| 11                     | Este es un strut de aire                                                                                                                                                                               |
| 12                     | Puede que se requiera el juego de piezas AK77 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 15                     | Excepto en los modelos equipados con una suspensión de resorte neumática trasera.                                                                                                                      |
| 21                     | Puede que se requiera el juego de piezas AK37 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 22                     | Se requiere el juego de piezas AK38 para instalar esta unidad.                                                                                                                                         |
| 23                     | Las monturas del amortiguador son ligeramente más estrechas que los tornillos de montura del coche, lubricación y un esfuerzo es necesario para instalar la unidad.                                    |
| 24                     | Esto es solo el balero, no es la base de amortiguador completa.                                                                                                                                        |
| 25                     | Puede que se requiera el juego de piezas AK42 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 26                     | Puede que se requiera el juego de piezas AK41 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 29                     | Este juego de montaje contiene el juego de cubre polvo 63975.                                                                                                                                          |
| 31                     | Puede que se requiera el juego de piezas AK43 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 41                     | Puede que se requiera el juego de piezas AK50 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 42                     | Puede que se requiera el juego de piezas AK51 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 43                     | Puede que se requiera el juego de piezas AK52 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 44                     | Puede que se requiera el juego de piezas AK53 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 46                     | Se requiere el juego de piezas AK79 para instalar un PAR de estas unidades en esta aplicación.                                                                                                         |
| 49                     | La herramienta especial AK73 está disponible para retirar e instalar esta base de amortiguador.                                                                                                        |
| 54                     | Puede que se requiera el juego de piezas AK68 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 56                     | El balero 901947 está disponible cuando se necesite reemplazar el balero solamente.                                                                                                                    |
| 57                     | Se necesitan herramientas especiales para instalar esta unidad.                                                                                                                                        |
| 58                     | Puede que se requiera el juego de piezas AK58 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos o si NO SON de diseño Cam. |
| 60                     | Aplicación especial : Este modelo NO necesita una capa debido a los espacios libres.                                                                                                                   |
| 63                     | Reemplaza el conjunto del strut que no tiene un corchete de asiento de resorte inferior.                                                                                                               |
| 64                     | Se requiere el juego de adaptadores AK14 para reemplazar el amortiguador neumático ajustable en los vehículos equipados con un sistema de nivelación automática.                                       |
| 66                     | Procedures for replacing Electronic Adjustable Suspension with non-adjustable product see Appendix A.                                                                                                  |
| 70                     | El balero 901902 está disponible cuando se necesite reemplazar el balero solamente.                                                                                                                    |
| 71                     | El balero 901901 está disponible cuando se necesite reemplazar el balero solamente.                                                                                                                    |
| 72                     | El balero 901928 está disponible cuando se necesite reemplazar el balero solamente.                                                                                                                    |
| 77                     | Se requiere el juego de piezas AK29 para instalar esta unidad cuando es necesario adaptar struts neumáticos a una suspensión no neumática.                                                             |
| 89                     | Puede que se requiera el juego de piezas AK71 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.                           |
| 90                     | Se requiere el juego de piezas AK75 para instalar esta unidad en vehículos equipados con frenos ABS.                                                                                                   |
| 97                     | Puede ser que requiera el juego bases y cubre polvo.                                                                                                                                                   |
| 106                    | El kit del adaptador AK-29 se requiere para instalar esta unidad al adaptar amortiguadores de choque ajustables del aire a los vehículos sin sistema de nivelación posterior.                          |
| 108                    | Solo utilice con Struts Monroe                                                                                                                                                                         |
| 115                    | Modelos con 31/4" espaciamento entre pernos de montaje más bajos.                                                                                                                                      |
| 116                    | En la placa de rodamiento de segundo diseño, la tuerca de la vara y el espaciador de E.O. son integradas en un solo componente.                                                                        |
| 117                    | Se requiere el juego AK28 para instalar en vehículos con barra de torsión trasera.                                                                                                                     |
| 122                    | Esta unidad es un amortiguador convencional NO electrónico                                                                                                                                             |
| 130                    | Excluye el uso con un brazo de soporte para torre de strut                                                                                                                                             |
| 148                    | Solo utilice con unidades de suspensión de equipo original.                                                                                                                                            |
| 152                    | Este amortiguador tiene un asiento de resorte                                                                                                                                                          |
| 195                    | Use solo amortiguadores de Equipo Original ó Número de Parte 5796 con Belgina como país de origen.                                                                                                     |
| 200                    | Requiere de 1 Kit por vehículo.                                                                                                                                                                        |

● Nuevo número de parte.

[1] Puede que se requiera el juego de piezas AK27 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.

[8] El compresor de resorte NO ES necesario para reemplazar los struts en este vehículo.

[66] Consulte los procedimientos para reemplazar la suspensión de ajuste electrónico por un modelo no ajustable en [monroe.com.mx](http://monroe.com.mx)

● Nuevo número de parte.

■ Número de parte bajo pedido especial.

The Rancho logo is rendered in a bold, italicized, metallic font with a 3D effect. It is enclosed within a dark, glossy oval frame that has a slight shadow and a highlight, giving it a sense of depth. The background of the entire page is a grayscale photograph of a vehicle's undercarriage, showing the suspension system, including the frame, control arms, and wheels, as it traverses a rocky, uneven terrain.

## INSTRUCCIONES IMPORTANTES PARA LA INSTALACIÓN

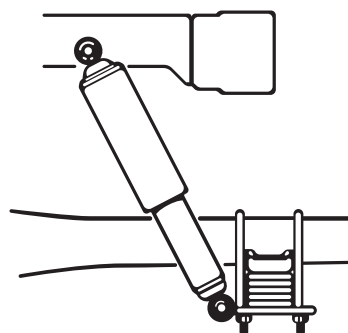

### UNIDADES DELANTERAS

Generalmente se deben instalar los amortiguadores y las unidades estabilizadoras en la misma posición y en la misma forma que los usados originalmente en el auto. Si las unidades se tuvieran que instalar en forma distinta, se suministran las instrucciones.

**IMPORTANTE:** En algunos casos, al instalar amortiguadores o unidades estabilizadoras delanteras pudiera ser necesario agrandar ligeramente el agujero en el brazo inferior de la suspensión, para permitir el pasaje de la unidad. Esto se puede lograr roscando la orilla interna del agujero, limando o rectificando. Agrande los agujeros sólo lo suficiente para permitir el pase de la unidad.  
**CUIDADO:** No lime ni rectifique la unidad.

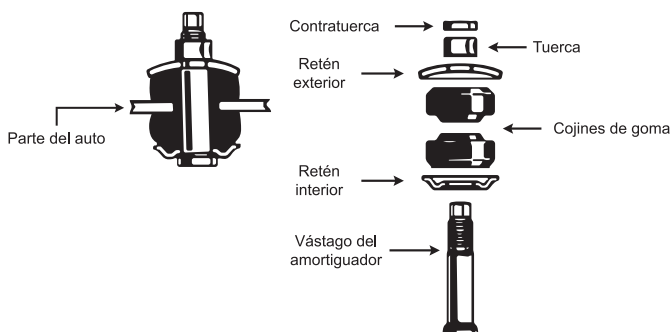

### UNIDADES TRASERAS

**IMPORTANTE:** Al instalar amortiguadores o unidades estabilizadoras traseras, asegúrese que todas las líneas hidráulicas del freno, las líneas de combustible y los caños de escape, estén libres de la unidad. Todas las distancias se deben verificar con la carrocería del auto arriba y abajo (con las ruedas colgando y la carrocería empujada hacia abajo). Cuando es necesario, mueva todas las líneas y los caños de escape para obtener distancias.

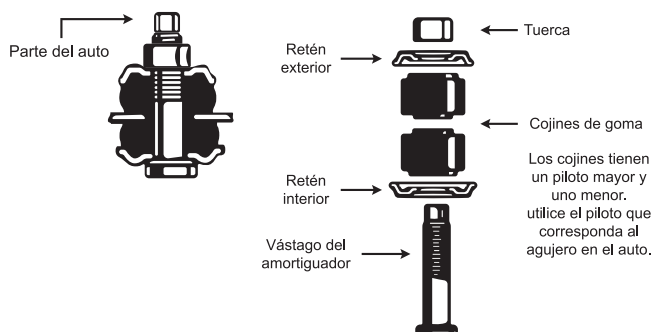

### VÁSTAGO CON RESALTO

Apriete la tuerca hasta que el retén asiente en el resalto

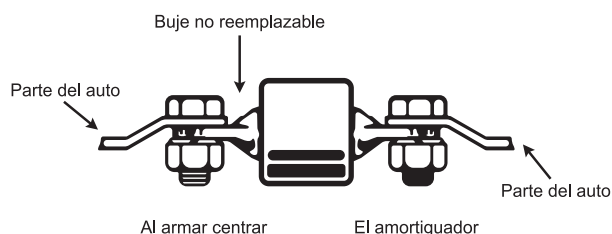

### VÁSTAGO SIN RESALTO

Apriete la tuerca hasta que los cojines sobresalgan casi hasta la orilla exterior del retén. No apriete excesivamente.

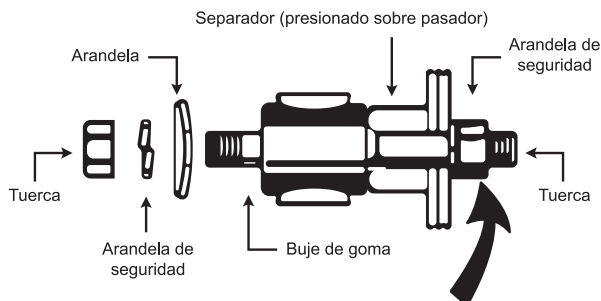

### ARMADO CON PASADOR CRUZADO

Los extremos achatados del pasador están diseñados para calzar en escuadra contra la placa de montaje a la altura normal del auto. Al instalar, si las partes achatadas no están en escuadra con la placa, gire el amortiguador media vuelta para mejor alineación.

### USE PIEZAS DE MONTAJE DEL PASADOR NUEVAS PARA REEMPLAZAR EL PASADOR ORIGINAL

Asegúrese que el pasador de montaje quede apretado para evitar que se afloje

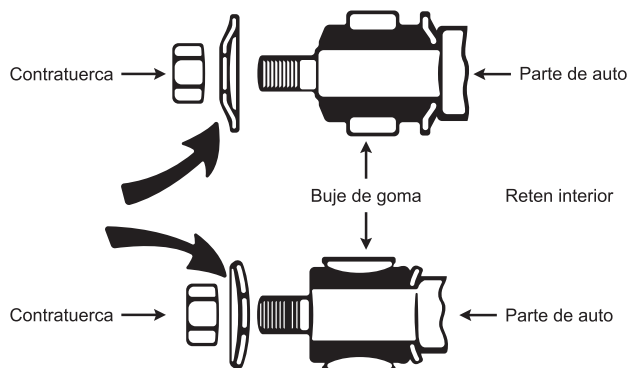

## INSTRUCCIONES IMPORTANTES PARA LA INSTALACIÓN

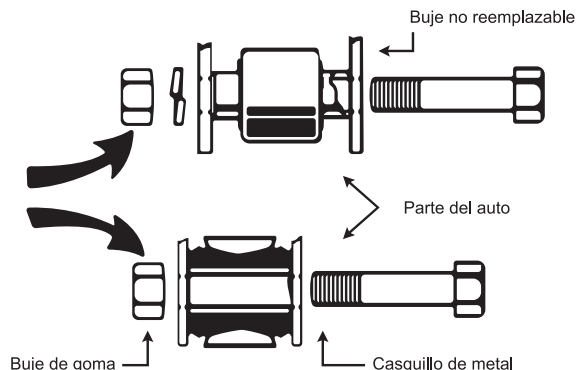

### MONTAJE SIN CASQUILLO INTERIOR

Se puede usar arandela plana o curva contratuerca, tome nota de la arandela curva cuando se retire el amortiguador original.

### MONTAJE CON MANGUITO INTERIOR

El perno de montaje debe estar bien apretado para evitar ruidos en este tipo de montaje.

### SE DEBE:

- 1. OBSERVAR LA UBICACIÓN.** De todas las piezas de montaje, arandelas, al retirarlas y asegúrese de volver a armar estas piezas en las mismas posiciones
- 2. PROCEDA CON CUIDADO.** Al instalar las unidades nuevas. Asegúrese que todos los pernos y las tuercas estén bien apretadas, Verifique las distancias.
- 3. SIGA LAS INSTRUCCIONES ESPECIALES QUE ACOMPAÑAN LAS UNIDADES.**

### NO SE DEBE:

- 1. NO RETUERZA LAS TUERCAS.** Si las tuercas están oxidadas, use un aceite de penetración sobre la rosca, deje pasar unos minutos para que penetre el aceite antes de desenroscar.  
  
Si las tuercas se han oxidado al punto que el aceite de penetración no funcione, se recomienda el empleo de un partidor de tuercas; cuidando de no dañar la rosca en el montaje, si es parte del auto.
- 2. NO SUJETE EL VÁSTAGO PULIDO DEL PISTÓN.** Con herramientas durante la instalación. Esto dañará al vástago y hará que falle la unidad.
- 3. NO DEJE COLGAR LAS RUEDAS.** Al cambiar los amortiguadores de los autos que tienen muelles en espiral traseros o muelles neumáticos.

# PUNTOS SORPRENDENTES MONROE

---

La mayoría de la gente cree que los amortiguadores y struts son necesarios solamente para mejorar el confort en el manejo de su vehículo. En realidad, hacen mucho más que eso. Aquí están varios puntos sorprendentes. ¿Sabía usted que...?

---

- Bajo condiciones normales de manejo, los amortiguadores y struts golpean un promedio de **1,087 veces** cada kilómetro que usted conduce – **eso es más de 65 millones de veces en 60,000 kilómetros!**

- Los amortiguadores y struts rara vez se dañan repentinamente por completo. En cambio, se deterioran gradualmente con el tiempo y los kilómetros recorridos, lo que permite que el conductor se acostumbre al cambio en el manejo y al control.

- **Los amortiguadores y struts ayudan a mantener su vehículo en contacto firme con el camino.** Unos amortiguadores y struts desgastados producirán que las llantas boten excesivamente, disminuyendo el control del conductor y la habilidad al frenar.

- **Un vehículo con sólo un amortiguador desgastado puede incrementar la distancia del frenado hasta por 3 metros.**

- Los amortiguadores no pueden ser reparados. Son unidades selladas que deben ser reemplazados una vez dañados.

- **¡Los amortiguadores y struts SON equipo de seguridad!** - Los amortiguadores y struts juegan un papel vital en proteger los componentes de fallas prematuras debido a que minimizan la cantidad de vibraciones a las que son sujetas los vehículos diariamente.

- Ahora que cuenta con los datos, ¿no está de acuerdo en que los amortiguadores y struts proveen más que solo un viaje confortable? **¡Proteja su inversión y obtenga una Inspección del Triángulo de Seguridad hoy!** Consiste en un proceso de tres partes durante el cual el proveedor de servicios verifica los componentes críticos del sistema interconectados que te permiten controlar tu vehículo de manera segura. Consulta el artículo en completo en <https://www.monroe.com/es-es/blog/safety-triangle.html>.

## GARANTÍA AUTOMÓVILES Y CAMIONETAS

LOS AMORTIGUADORES, CARTUCHOS Y STRUTS OESPECTRUM®, REFLEX®, RANCHO®, GAS-MAGNUM®, MONRO-MATIC PLUS®, MONRO-MATIC®, MONRO-ROADMATIC® Y MONROE® BASES DE AMORTIGUADOR están garantizados contra cualquier defecto de material, fabricación o mal funcionamiento que se presente durante el uso del vehículo operando en condiciones normales; la garantía no cubre el mal uso de los mismos.

### LA GARANTÍA ES LA SIGUIENTE:

- › OESpectrum®, Reflex®, Sensa-Trac®, Gas-Magnum®, Amortiguadores Electrónicos y Amortiguadores autonivelables (Nivomat), CUATRO AÑOS Ó 300,000 kms., lo que suceda primero.
- › Rancho® RS5000, RS5000X, RS7000MT, RS9000XL y QuickLift® Loaded, están garantizados por CUATRO años ó 350,000 kms., lo que suceda primero.
- › Monro-Matic Plus®, CUATRO AÑOS Ó 300,000 kms., lo que suceda primero.
- › Monro-Matic®, DOS AÑOS Ó 150,000 kms., lo que suceda primero.
- › Monro-RoadMatic®, DOS AÑOS Ó 100,000 kms., lo que suceda primero.
- › Max-Lift®, Max-Air®, Monroe® Bases de Amortiguador, DOS AÑOS Ó 50,000 kms., lo que suceda primero.
- › La garantía para vehículos comerciales es de UN AÑO Ó 50,000 kms., (para todas las líneas en autos o camionetas) lo que suceda primero.

### ESTA GARANTÍA NO CUBRE DESGASTE NORMAL OCASIONADO POR USO, NI SE HARÁ EFECTIVO CUANDO LOS AMORTIGUADORES, CARTUCHOS O STRUTS:

- Hayan sido instalados incorrectamente.
- Presenten rayas o marcas en las flechas, ocasionadas por alguna herramienta usada para detener el giro de la misma en la instalación.
- Muestren daños o golpes originados por motivos ajenos al funcionamiento.
- Presenten alguna modificación o alteración en su diseño original de fabricación.
- Presenten signos vitales de abuso en el uso.
- Presenten fallas ocasionadas por la rotura o no instalación de los topes de la suspensión.
- Se instalen en vehículos para los cuales no fueron diseñados y que no correspondan a lo indicado en nuestro catálogo.
- Sean instalados en vehículos que han sido modificados con respecto a su diseño original.

La garantía consiste en la reposición de la pieza por una nueva y no incluye gastos de desmontaje o instalación. Sólo se cambia la pieza dañada y no el PAR.

Para que el usuario goce de esta garantía, deberá entregar los amortiguadores, cartuchos o struts defectuosos junto con la factura original que cumpla con lo establecido en el artículo 29 de la CFF, firmar el Formato de Reclamo de Garantía Último Consumidor debidamente llenado (véase pág. 248) y tapa(s) de la(s) caja(s) de las(s) pieza(s) de reemplazo, estos requisitos son indispensables para el procesamiento de la garantía y para verificar que el producto está dentro de su tiempo de garantía para su reposición.

## FORMATO DE SOLICITUD DE GARANTÍA

Esta sección debe ser completada para asegurar el cambio de producto.

Nombre Instalador \_\_\_\_\_ Teléfono \_\_\_\_\_  
Nombre Refaccionario \_\_\_\_\_ Teléfono \_\_\_\_\_  
Dirección \_\_\_\_\_  
Ciudad/Estado \_\_\_\_\_ Código Postal \_\_\_\_\_

Esta sección debe ser llenada para poder recibir el reemplazo de la pieza ó piezas defectuosas.

### A. INFORMACIÓN DEL CONSUMIDOR

Los requisitos mínimos para ser candidato a garantía son:

- 1) Ser el comprador original del producto DRiV (Monroe, Rancho).
- 2) Presentar la Factura Original de compra del producto DRiV.

Nota: El cliente conserva el recibo original y documentación para futuras reclamaciones.

Firma del consumidor \_\_\_\_\_ Nombre \_\_\_\_\_

Fecha de reemplazo (DD/MM/AA) \_\_\_\_\_ Teléfono consumidor ( ) \_\_\_\_\_

### B. NÚMERO DE PARTE DE REEMPLAZO

| Número de Parte Reclamado | Cantidad Piezas | Código de Defecto* | Kilometraje Instalación | Fecha Compra | Fecha Actual | Kilometraje Actual |
|---------------------------|-----------------|--------------------|-------------------------|--------------|--------------|--------------------|
|                           |                 |                    |                         |              |              |                    |
|                           |                 |                    |                         |              |              |                    |
|                           |                 |                    |                         |              |              |                    |
|                           |                 |                    |                         |              |              |                    |
|                           |                 |                    |                         |              |              |                    |

AMORTIGUADORES  
Y STRUTS

## AMORTIGUADORES Y STRUTS OESPECTRUM®

### AMORTIGUACIÓN SILENCIOSA

Calidad probada, de confianza mundial.

Los amortiguadores y struts OESpectrum, diseñados para automóviles, camiones ligeros y SUV, utilizan Twin Technology™ o tecnología Monotubo para filtrar el ruido y las válvulas específicas del vehículo para proporcionar un manejo excepcional.

#### DISEÑADO PARA DURAR

El sello de aceite autolubricante retiene el gas y reduce el exceso de fricción contra la varilla del pistón para ayudar a reducir el desgaste prematuro.

**SOMOS DIFERENTES**

## INCLUYE

### AMORTIGUACIÓN UNIFORME

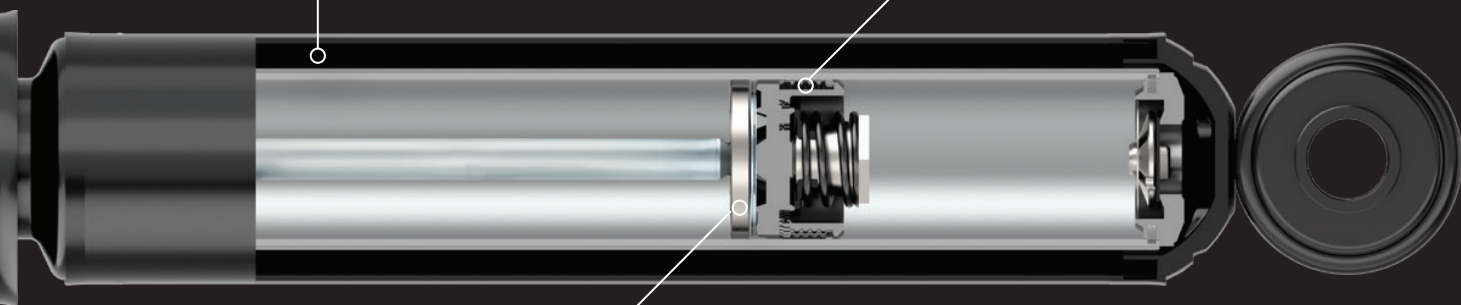

El aceite del equipo original para todo tipo de clima contiene aditivos especiales para ayudar en temperaturas extremas y reducir la degradación del aceite.

### CONTROL Y DURABILIDAD

El pistón con banda de PTFE proporciona un sellado uniforme entre el pistón y el tubo de presión para un mejor control y una mayor durabilidad.

### MANEJO EXCEPCIONAL

Ajustada específicamente para cada aplicación, la válvula de varilla desplazada completa se ajusta automáticamente a los niveles extremos de la carretera mientras que el orificio más grande proporciona un control de absorción más eficiente de modo de proporcionar consistencia y amortiguación suave.

**SEÑALES DE QUE LLEGÓ EL  
MOMENTO DE UN REEMPLAZO**

Si tiene alguno de estos problemas, podría ser momento de reemplazar los amortiguadores o struts.

- RUIDO EXCESIVO
- REBOTE EXCESIVO
- MANEJO DEFICIENTE
- FALTA DE ESTABILIDAD
- SUSPENSIÓN QUE TOCA FONDO ABRUPTAMENTE
- DUREZA POR BACHES

**NO ESPERE HASTA QUE  
SEA DEMASIADO TARDE**

Los nuevos productos de control de amortiguación pueden ayudar a mejorar el rendimiento de su vehículo, incluyendo:

- MEJOR CONTROL DE AMORTIGUACIÓN
- MEJOR MANEJO
- MENOR DESGASTE PREMATURO DE LOS NEUMÁTICOS

**UNA CARTERA COMPLETA DE SOLUCIONES DE  
CONTROL DE AMORTIGUACIÓN**

Visite [Monroe.com.mx](http://Monroe.com.mx) para explorar todas nuestras ofertas de productos y encontrar la solución adecuada para usted.

**ENCUENTRE LAS PIEZAS QUE NECESITA**

¿Está listo para empezar?

Escanee el código QR, introduzca la información de su vehículo y le indicaremos la pieza perfecta para el vehículo que está reparando.

## NOTAS

[illegible]

A man with a beard and glasses, wearing a dark t-shirt, is working in a workshop. He is standing next to a large industrial machine, possibly a lathe or mill, and is focused on his work. The workshop is filled with various tools and equipment, including a workbench with several cylindrical parts. The background shows a typical industrial setting with overhead lights and structural elements. The MONROE logo is overlaid in the center of the image.
